*Re: Revision of Part 15 of the Commission's Rules to Permit Unlicensed
National Information Infrastructure (U-NII) Devices in the 5 GHz Band,
ET Docket No. 13-49*

*Comments in Support of Petition for Reconsideration of WISPA, Cambium, Mimosa
Networks and JAB*

Dear Ms. Dortch,

Thank you for your time and attention. The new rules imposed will have a MAJOR effect on our company. We rely on the 5 GHz band to connect our customers. If the FCC does not reverse this ruling, we will have to replace our current equipment used to provide service to our customers and purchase new equipment. This will provide an economic hardship to our company and could possibly cause us to close our business. We do not have the finances required for this economic impact. We have estimated this will cost our business in excess of \$550,000.00 to comply with the new FCC rule change. Not only does this affect our business and our employees, but it also affects our customers. They will no longer be able to purchase an affordable, reliable internet service. The restrictions imposed will also increase the cost for our customers.

Eliminating the flexibility to allow devices to continue to be certified under Section 15.247 was entirely unnecessary and will significantly harm ability of many rural WISP customers to continue to receive broadband and voice services.

I request that the FCC reconsider this ruling and consider the damage to my business and the wireless Internet service provider industry.

I urge reconsideration of Revision of Part 15 of the Commission's Rules to Permit Unlicensed National Infrastructure (U-NII) Devices in the 5GHz Band, ET Docket No 13-49.

Respectfully,

Jerry L. Young
President
